### Results can only be maintained through change

Richard Löwenthal

Since our family-run company was founded in 1924, a great deal has changed in the world of technology and development. And yet one thing has remained the same: the consistent, excellent quality of our products, which is appreciated by all discerning professionals. Whether in the development, manufacture or sales of tools, ELORA guarantees a tried-and-tested combination of professional tool solutions and **Made in Germany** quality.

Our highly trained ELORA employees work hard to achieve this success in two state-of-the-art production plants in Germany. Day in, day out. No ifs and buts. Their motivation and passion for the job in hand, combined with regular training and a strict quality assurance system are the reasons why our ELORA tools are used and valued around the world.

At times we might think out of the box to come up with new ideas. And we are inspired by your suggestions. Because outstanding products don't just rely on optimisations. They also require movers and shakers. In order to make sure this continues into the future, we act as pioneers - breaking new ground. Even when this new ground may sometimes appear somewhat unusual. Go with us.

### Our Service for you:

- Consultation
- Skilled and professional
- Logistics
- Flexible and punctual
- After Sales
- Satisfaction - guaranteed

□ Quality means the customer comes back, not the goods □  
Hermann Tietz

That's why the name ELORA stands for the premium quality of our tools - it's not for nothing that they carry the (Made in Germany) seal of approval. We are proud of the fact that in line with our regional commitment, our products are manufactured in our plants in Germany - in compliance with top quality standards and according to our guiding principles. ELORA tools represent a sophisticated combination of high functionality, maximum performance and long durability.

We ensure that all quality-related work that forms part of the manufacture of our tools is carried out in Germany. From the initial stages of production through to machine assembly and the final, hardening heat treatment. These guiding principles also lead the work of our long-term partners, who put the partial or complete finishing touches to our products. Which means you can be sure you'll get tools that have been crafted with a strong commitment to premium quality, whether it's a firm grip, precise cut or tight pull you need for your work. If it says ELORA on the outside, it's sure to be ELORA on the inside.

Our complete **Range** includes:

- Workshop range
- Spanners, socket spanners
- Operational tools
- Torque wrenches
- Screwdrivers
- Impact tools
- Hammers and striking tools
- Pliers, bolt cutters and scissors
- Measuring and inspection tools
- Vehicle and specialist tools
- VDE tools
